

Summit County Resource Allocation Park

High Country Compost
(Summit County Landfill)

COMPOST USE & INSTRUCTIONS

Sod Preparation - Blend compost with existing soil. Use between 3 cubic yards per 1000 square feet (1" thick) to a maximum of 6 cubic yards per 1000 square feet (2" thick). Roto-till soil, disc, or manually blend this layer of compost with 6" of existing soil. It is best to mix soil first, then apply compost, then mix compost and loosened soil again.

Seed Bed Preparation - Blend compost with existing soil. Use between 1-1/2 cubic yards per 1000 square feet (1/2" thick) to a maximum of 3 cubic yards per 1000 square feet (1" thick). Roto-till, disc, or manually blend this layer of compost with 6" of existing soil. It is best to mix soil first, then apply compost, then mix compost and loosened soil again.

Backfilling Trees - one part of compost with 3 parts of native soil and backfill around root ball.

Vegetable Gardens & Flower Beds - Blend compost with existing soil. Use between 3 cubic yards per 1000 square feet (1" thick) to a maximum of 6 cubic yards per 1000 square feet (2" thick). Roto-till, disc, or manually blend this layer of compost with 6" of existing soil. It is best to mix soil first, then apply compost, then mix compost and loosened soil again.

Bedding Plants - Spread 1/8 to 1/4" of compost evenly on top of soil, mix into the soil, and then water thoroughly.

House Plants - Spread 1 tablespoon per 6" pot or about 1/8" of compost evenly over the top of the soil and water. Repeat every six months or when required.

2018 COMPOST PRICES

US Composting Council
Seal of Testing Assurance
